

PRESS RELEASE

"Internal - around" is the exhibition by Sergio Aiello to 'Oratorio de' Disciplinanti in the Monumental Complex of Santa Caterina in Finalborgo -Finale Ligure (SV).

On display are the latest works of "Watching the Sky" cycle and artistic research of recent years landscape. The critique is Gianfranco Schialvino: << .. Aiello acts synthetically referring to the colors isolating subjects from the context (the subject now seems to have become, at the limit of significance, conceptually fluid and poor bearer of interests if not for his possible manipulative potential), while the design, the "mindset" who designed the scene, now serves only to define the lines of force within which unroll the main elements of the composition. Proceeds by synthesis, for concentration, layer by layer, by thickening the nucleus, amalgamating the edge, diluting the borders, seeking the dissolution, chasing the soul of the figure (of a slavish imitation) has disappeared in the horizon, sublimated in the name of a broader perspective in which she flew to flee after being banished from the scene. Are the splashes of color that draw its landscape, mixed, superimposed, scratched .. >>
